REACH - Certificate of Conformity

EU Legislation for dealing with chemicals (Regulation No. 1907/2006)

What is REACH?
REACH is an EU regulation to limit the use of harmful chemicals in products.

REACH specifies a list of “Substances of Very High Concern” (SVHC). Companies are obligated to register if their products contain SVHC.

REACH in relation to Alumeco Group
As Alumeco Group is a distributor of products, we do not manufacture products nor import chemicals.

Our obligation as the distributor is to inform customers if they purchase products containing SVHC.

On the following pages, you will find a list of alloys that are either compliant or non-compliant with REACH. The lists are not exhaustive.

Please do not hesitate to contact us if you need any additional clarification.

Best regards,

Christian Skjold Højgaard
Quality Engineer
